

University of Rijeka, Faculty of Medicine

Curriculum 2023/2024

Compulsory course

Social Medicine

Study program: **Medical Studies in English (R)**
[Razina studija]: **Integrirani prijediplomski i diplomski sveučilišni studiji**
Department: **Katedra za socijalnu medicinu i epidemiologiju**
Course coordinator: **prof. dr. sc. Rukavina Tomislav, dr. med.**

Year of study: **1**
ECTS: **2.00**
Incentive ECTS: **0.00 (0.00%)**
Foreign language: **Possibility of teaching in a foreign language**

Course information:

The course Social Medicine is a first year compulsory course of Medical Studies in English. The course consists of 15 hours of lectures and 20 hours of seminars, leading to a total of 35 hours (2 ECTS). The course is conducted in the lecture rooms of the University of Rijeka, Faculty of Medicine. The lectures will be held online.

The goals of the course are introducing the students to the basic development of social medicine, the promotion of health and prevention of diseases. Lectures and seminars will explore the determinants of health and health inequalities between populations, how social factors influence medical knowledge, health care, health promotion and disease prevention. Students will learn about basic communication skills and the creation of population based preventive programs. They will get an overview of specific features of community-based organization of healthcare in disasters, the basics of health care and social care organization.

Course content: This course will introduce students to the theory and practice of social medicine to enable them to recognize social influence on population health, organization of health and social care in regular and emergency conditions, most important health risks, ways of preventive action and health improvement.

LEARNING OUTCOMES: By the end of this course, students should be able to:

I. COGNITIVE DOMAIN - KNOWLEDGE

- Understand how social medicine can contribute to care by recognizing how social and economic forces influence who gets sick, what disease afflict them, which treatments are available to them
- Appreciate how knowledge of a community can enhance their ability to provide care to people from that community, recognize the social factors influence to health and the influence of population health on the society
- Understand and describe the meanings of health and disease, risk factors and evaluation of population health
- understand the complex origins of global health problems and how specific strategies can be implemented to change both global health policy and health care delivery
- recognize the types of disparities that exist according to race, gender, geography, and other parameters

II. PSYCHOMOTORIC DOMAIN - SKILLS

- Apply the insights of social medicine to develop solutions that could improve the delivery of health care on local, national and global scales.
- Imagine system of medicine and public health that might best eclipse the burden of disease
- Examine the influence of the determinants of health as well as ways and possibilities for population preventive actions.

The way the classes are organized: Classes are organized in form of lectures and seminars. Students will actively participate in the course through seminars, which they will prepare in collaboration with the instructors. The lectures will engage students by actively reflecting on various issues. Seminars will prepare students for independent problem solving and integrative thinking. Through seminars, students will be introduced to the impacts of social determinants and their negative influence on health as well as preventive measures. Active participation of students throughout the course will be encouraged through independent reading and seminars. Students need to prepare the reading, which will be discussed in lectures and seminars. The final grade will be the sum of acquired points throughout the course and the final exam. Each student will be assessed on class participation during seminars (demonstrated knowledge, understanding, problem solving, concluding, etc.). Other student activities are also evaluated such as.

List of assigned reading:

1. Social medicine (the script). University of Rijeka, Faculty of Medicine, Rijeka, 2017.
2. A Conceptual Framework for Action on the Social Determinants of Health. Social Determinants of Health Discussion Paper 2 (Policy and Practice). World Health Organization, Geneva, 2010. (Available at: http://www.who.int/sdhconference/resources/ConceptualframeworkforactiononSDH_eng.pdf)

List of optional reading:

1. Selected articles from relevant journals and books available on the Internet

Curriculum:

Predavanja list (with titles and explanation):

L1: : Definition and Tasks of Social Medicine

Understand basic terminology and concepts of social medicine. Describe historical overview. Present the most important roles and tasks of social medicine.

L2: Determinants of Health

Identify and describe the most important factors that affect health.

L 3: Health Inequalities

Recognize social inequalities and their impact on health.

L4: Special Populations and Their Specifics

Define special population groups. Recognize health needs and health care of special population groups.

L5: Health Promotion and Disease Prevention

Present and list organized ways of population - wide health promotion and disease prevention at the population level

L6: Health Education

Define and describe basic health education concepts in terms of improving the health status of the population

L7: Communication Skills

Define and describe basic health education concepts in terms of improving the health status of the population

L8: Health in the Community - "Healthy Cities", "Healthy Counties"

Describe the basics of maintaining and improving health in community. Outline the features of local and regional projects in the organization of public health projects and their impact on community health. Recognize current trends in health promotion at the local and regional level

L9: Health and Health Indicators

Define health indicators. List the most important indicators and measures of population health

L10: International Health Organizations

Describe the organization and understand the tasks of the most important international health organizations.

L11: Leading Health Challenges of the 21. century

Identify the most significant risks for the health of the population. Describe the most important leading causes of mortality and morbidity. Recognize selected health statistics data of population and health condition (Croatia, world). List the main causes of global and local morbidity.

L12: Health Care

Understand and describe the organization of health care

L13: Social Care

Define and describe legal frameworks of social welfare

L14: : Health Care in Emergencies

Understand the role of health care in emergencies situation.

L15: Globalization and Health

Recognize the influence of the modern world and globalization on the health status.

Seminari list (with titles and explanation):**S1: Lifestyle as Health Determinant**

Recognize the impact of lifestyle on health

S2: Healthy Ageing

Recognize determinants of healthy ageing.

S3: Quality of Life

Understand the measurements of quality of life

S4: Poverty as a Health Determinant

Understand the impact of poverty on health and healthcare acces

S5: Health Care System

Recognized the strengths and weaknesses of different model of health care organizations

S6: Health Promotion

Understand the value of health promotion

S7: Case study - debate

Students will work in subgroups on a given thematic unit with the help of a mentor and present the final seminar paper.

Student obligations:

Students have to prepare seminars based on the assigned reading and participate in discussions. The mentor will evaluate students' participation in and preparation of the seminars (demonstrated knowledge, understanding, conclusions, seminar paper, etc.). The final grade will be the sum of acquired credits throughout the course and the final exam. The final exam is in the form of multiple-choice test

Exam (exam taking, description of the written/oral/practical part of the exam, point distribution, grading criteria):

The assessment of students is carried out in accordance to the current Regulation of studies of the University of Rijeka, and according to the Regulation of Student Assessment at the Faculty of Medicine in Rijeka (adopted by the Faculty Council of the Faculty of Medicine in Rijeka). The students are evaluated during the course and on the final exam (a total of 100 credits). Of a total of 100 credits, a student can acquire 50 credits during the course and 50 credits on the final exam.

I. Assessment during the course (max 50 credits): a) active participation in seminars and paper presentation (20 credits) b) participation in seminars and paper presentation (20 credits)

excellent	20 credits
very good	15 credits
good	12 credits
sufficient	10 credits

b) Seminar paper (max 30 credits)

excellent	30 credits
very good	25 credits
good	20 credits
sufficient	15 credits

II. Final exam (50 credits) Specific competences are assessed on the final exam. The final exam is a multiple-choice test comprising 50 questions and credits are awarded only if the student scores at least 50% on the test.

The students who can take the final exam are:

- Students who acquired min 50% credits during the course (25 credits) The students who can not take the final exam:
 - Students who achieved 0 to 49.9 % credits during the course or who have 30% and more absences from classes. That student is unsuccessful (1) F and can not take the final exam, i.e. the course must be re - enrolled in the next academic year.
- III.

The final grade is the sum of the credits obtained during the course and on the final exam. It is determined based on absolute distribution.

Final grade	
A (90 – 100%)	excellent (5)
B (75– 89,9%)	very good (4)
C (60 – 74,9%)	good (3)
D (50 – 59,9%)	sufficient (2)
F (students who achieved less than 25 credits during the course or who scored under 50% on the final exam)	insufficient (1)

Other notes (related to the course) important for students:

Seminars are held during the course. For each class students should be prepared for discussion. It is mandatory to consult with the mentors. Mentors follow the progress of a group and of individual students. The seminar papers will be presented in the final seminar. Students are required to submit their seminar paper (based on the instructions for writing seminar papers) and PowerPoint presentation not later than one week before the seminar presentation. Materials and all notices related to the course are on the platform Merlin
